

### Abstract

This research study aims 1) 1. To study behavior management, reduce costs, and evaluate the effectiveness of two alternative energy. The appropriateness of the use of renewable energy technology in the office and the community. 3. To contribute to the solutions and renewable energy sector and to meet the needs of renewable energy survey (Survey Research) research group case study for the office and the community to the canal. The canal links. Buddhist province Nakhon Pathom.: Analysis of behavior management, reduce costs, and evaluate the effectiveness of renewable energy questionnaire asks a number of 400 samples from the results of the study were found in the use of renewable energy. The findings showed that The demand for renewable energy The overall agree ( $\bar{x} = 4.07$ ), the demand for renewable energy. Comments are at a high level ( $\bar{x} = 3.80$ ), followed by the introduction of renewable energy used in many opinions ( $\bar{x} = 3.75$ ), followed by the type of biomass that needs to be used. Comments are at a high level ( $\bar{x} = 3.54$ ), followed by the use of renewable energy technologies. Opinions on the level with moderate ( $\bar{x} = 3.41$ ).

The hypothesis testing found that for the hypothesis. In research on behavior management, reduce costs, and evaluate the effectiveness of renewable energy. For the office and the community to the canal. The canal links. Monthon Nakhon Pathom.: Analysis of the use of renewable energy technologies used. Found. This assumption And behavior management, reduce costs, and evaluate the effectiveness of renewable energy: The analysis found that meets the different hypothesis significance level of 0.05.
