Acknowledgement.....	๗
Abstract.....	๘
บทคัดย่อ.....	๙
Table of content.....	๑
List of tables.....	๗
List of figures.....	๗
 Chapter	
1 Introduction.....	1
1.1 Research problem and its significance.....	1
1.2 Objectives.....	2
1.3 Hypothesis.....	3
1.4 Expected outcome.....	3
1.5 Scope of research.....	3
2 Literature review.....	4
2.1 Bioactive compounds of lime.....	4
2.2 Lime powder production.....	5
2.3 Entrapment technique.....	6
3 Methodology.....	7
3.1 Materials.....	7
3.2 Preparation of lime juice.....	7
3.3 Spray drying of lime powder.....	8
3.4 Particle size and morphology characterization.....	8
3.5 Physical properties of lime powder.....	9
3.6 Solubility and hygroscopicity.....	9
3.7 Determination of Ascorbic acid content.....	10
3.8 Determination of total phenolic, and total flavonoid contents.....	10
3.9 Antioxidant activity.....	11
3.10 Data analysis.....	11

Table of contents (cont')

	Page
4 Results and discussion.....	12
4.1 Lime juice composition.....	12
4.2 Morphology and particle size analyses of lime powder.....	12
4.3 Lime powder analyses.....	14
4.4 Solubility and hygroscopicity.....	15
4.5 Phytochemical and antioxidant activity analyses.....	16
5 Conclusion.....	18
5.1 Conclusion.....	18
5.2 Recommendation.....	19
Bibliography.....	20
Biography.....	22

List of tables

Table		Page
4.1	Particle size of lime powder with and without homogenization.....	13
4.2	Physical analyses of lime powder with and without homogenization.	15
4.3	Ascorbic acid, gallic acid, quercetin and trolox equivalents of lime powder with and without homogenization.....	16

List of figures

Figure		Page
4.1	SEM images of spray-dried lime powders (A) without homogenization (B) with homogenization.....	14
