Fiscal year : 2016

Keywords: Space Syntax, the Movement and Closure traffic politics, the Protestors Trouble

### Abstract

The situation of Bangkok shutdown in 2012- 2014 has the very dangerous situation. Especially in 2014, The group protest usually closes the politic landmark and shut down the transportation and move around Bangkok. Application of Space Syntax to ways to transport people out of the movement and closure of the protestors trouble in Bangkok have two objectives. The first one, what kind of pattern and movement is. And the second one, what is the relation between closure of the protestors trouble and syntax of space. The find out of this research will be the benefit for government to understand this crisis and decrease economic problem from protestors.
